Criteria for a Centre of Reference for Pediatric Diabetes

- Sufficient activity and capacity to provide relevant services at a sustained level of quality
- Capacity to provide expert advice, diagnosis or confirmation of diagnosis, to produce and adhere to good practice guidelines and to implement outcome measures and quality control
- Multidisciplinary approach
- High level of expertise and experience, as documented through publications, grants, or honorific positions, teaching and training activities
- Strong contribution to research
- Involvement in epidemiological surveillance such as registries
- Close links and collaboration with other expert national and international centres, and capacity to network
- Close links and collaboration with patient associations where they exist
- Appropriate arrangements for patient referrals from other EU countries
- Appropriate capacities for diagnosing, following up and managing patients with evidence of good outcome
